

Our March Madness Shock and Strut Special

Buy 3 and get the 4th for FREE!
Installed Only

**Rough Roads and Potholes Take A Toll
On Your Struts and Shocks**

By the time you think you need new shocks or struts, it's usually way past the point when they should have been replaced.

- Does it bounce excessively when driving on rough roads or after hitting a bump?
- Does the nose dip when braking?
- Does the body roll or sway excessively when cornering or driving in crosswinds?
- Does the suspension bottom out when backing out of the driveway or when hauling extra passengers or weight?

If you said yes to any of these chances are your Struts or Shocks are due to be replaced

**Still not sure? Stop in and our
professional technicians will check
them for you at no-charge**
